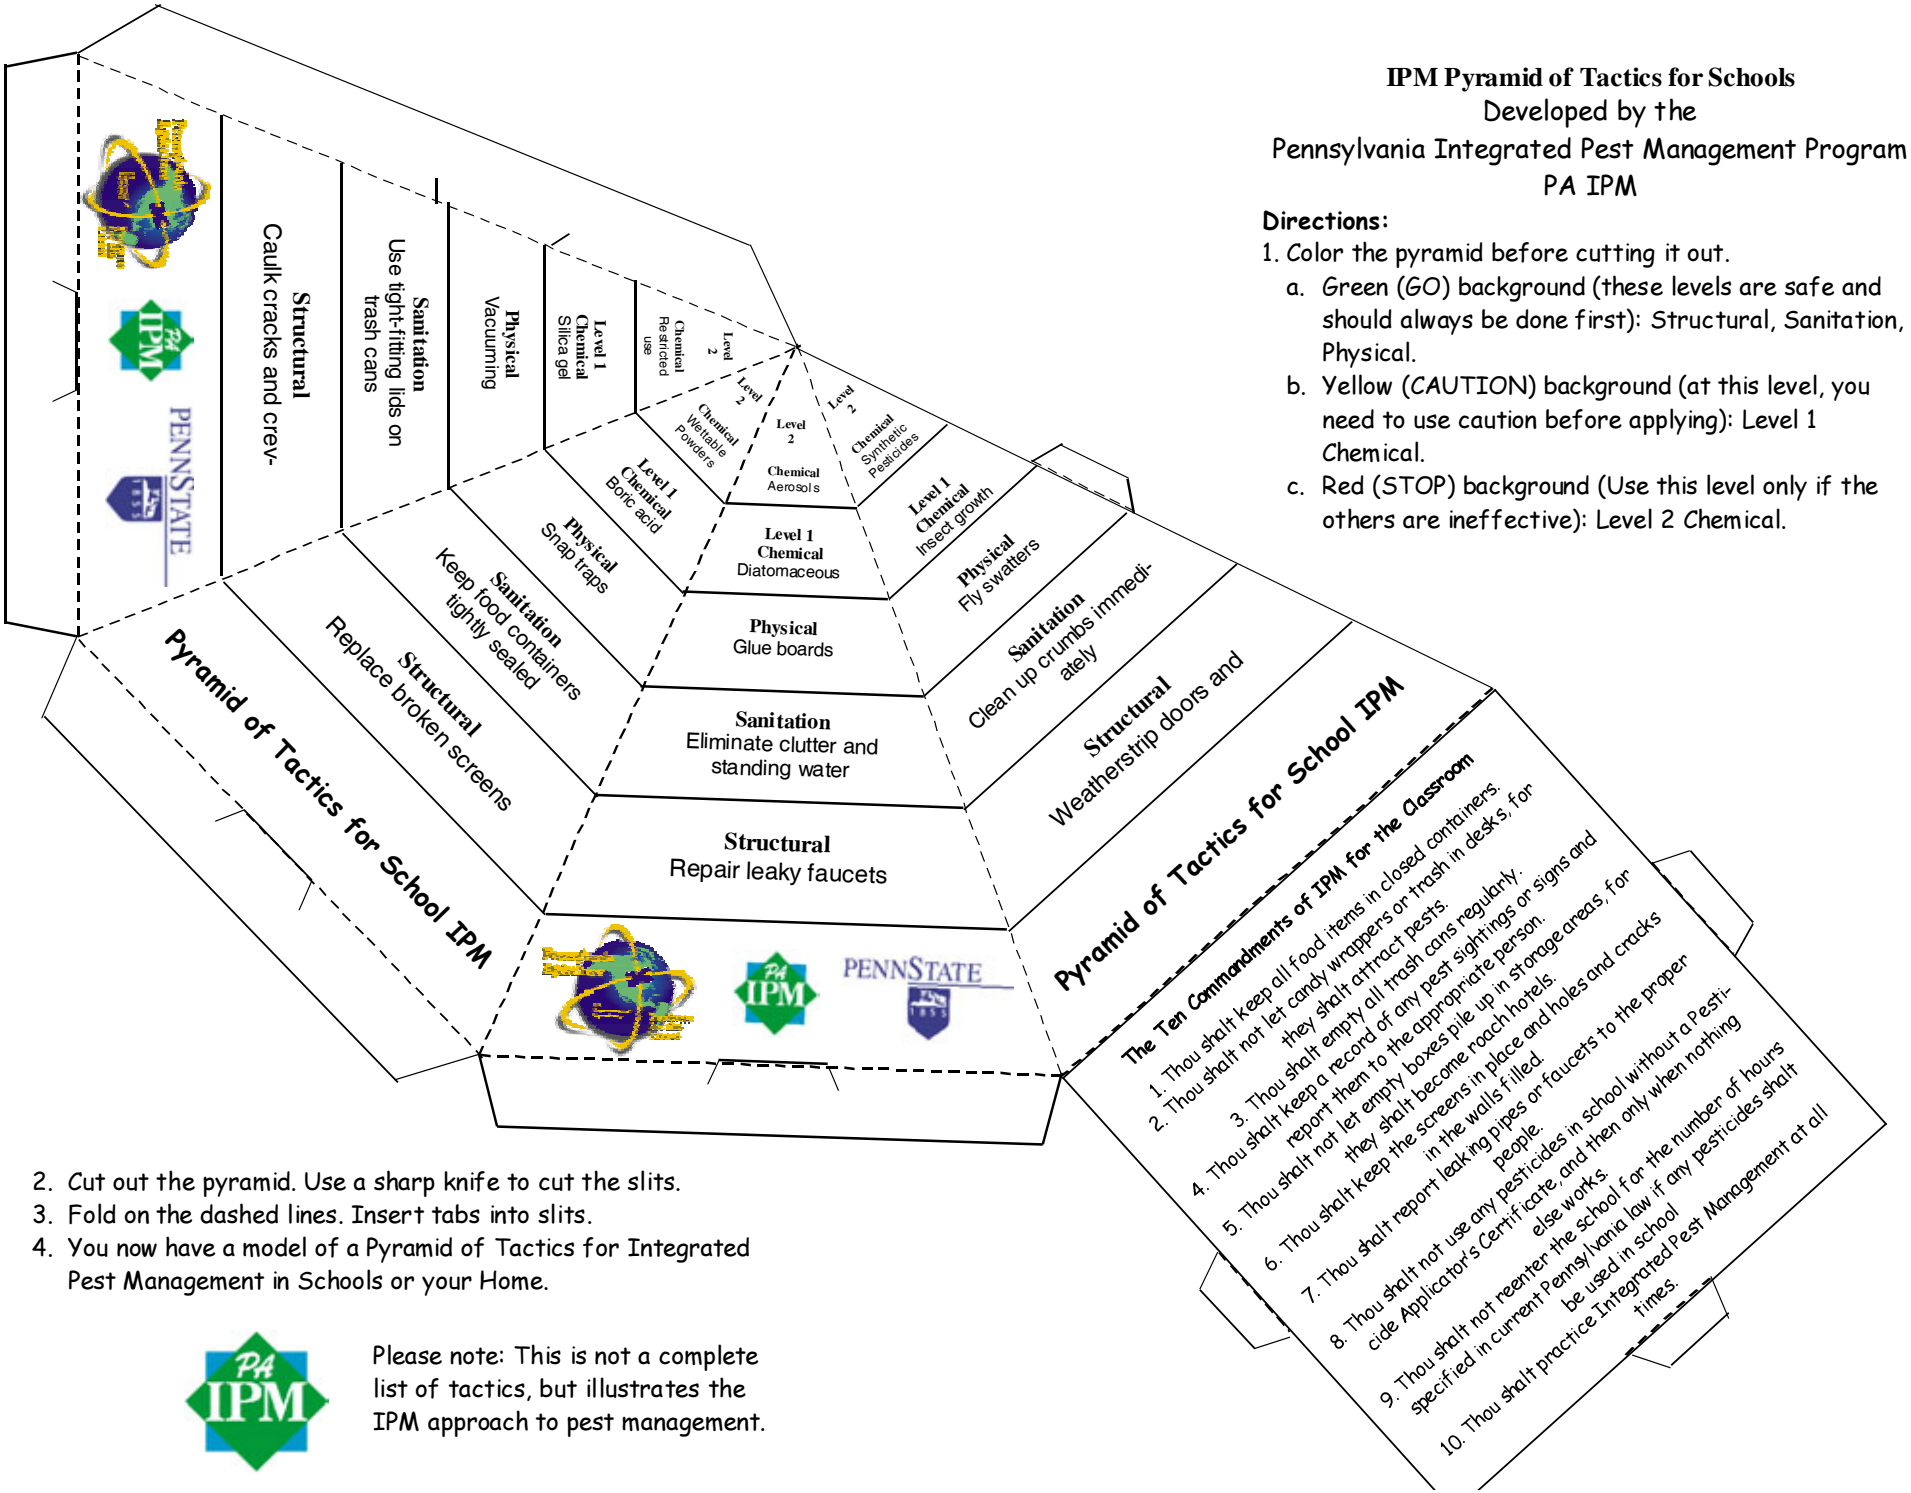
**IPM Pyramid of Tactics for Schools**
Developed by the
Pennsylvania Integrated Pest Management Program
PA IPM

**Directions:**

1. Color the pyramid before cutting it out.
   a. Green (GO) background (these levels are safe and should always be done first): Structural, Sanitation, Physical.
   b. Yellow (CAUTION) background (at this level, you need to use caution before applying): Level 1 Chemical.
   c. Red (STOP) background (Use this level only if the others are ineffective): Level 2 Chemical.



2. Cut out the pyramid. Use a sharp knife to cut the slits.
3. Fold on the dashed lines. Insert tabs into slits.
4. You now have a model of a Pyramid of Tactics for Integrated Pest Management in Schools or your Home.

Please note: This is not a complete list of tactics, but illustrates the IPM approach to pest management.
