Photography, which was invented in the 1800s, helps us capture life's important moments and events. In this two-skill-level project, youth first learn about camera parts and functions and different types of film and cameras. Part two teaches them how to take photos of a variety of subjects, utilizing different angles and lighting.

4-H and Schools: A Great Partnership!

4-H is a youth development program of Penn State Cooperative Extension. It is a nonformal education program for youth between the ages of 8 and 19.

4-H projects are offered to youth through community clubs, project clubs, and special interest groups, as enrichment to school curricula, and in the 4-H Afterschool program. Projects are based on research, and many help to support the Pennsylvania Department of Education Academic Standards.

This publication is available in alternative media on request.

Penn State is committed to affirmative action, equal opportunity, and the diversity of its workforce.
