Water Lion

Recommended grade level:

Project length:

Cost:

Teacher's responsibility:

For more information, contact:

This project can help youth to discover just how essential water is to life. Two project books, *Water Conservation* and *Incredible Water*, guide lessons about the importance of water and teach the specifics of conservation and water use, water resources, and the ways water is wasted every day. Participants explore the properties and forms of water, the water cycle, and the watersheds of Pennsylvania.

4-H and Schools: A Great Partnership!

4-H is a youth development program of Penn State Cooperative Extension. It is a nonformal education program for youth between the ages of 8 and 19.

4-H projects are offered to youth through community clubs, project clubs, and special interest groups, as enrichment to school curricula, and in the 4-H Afterschool program. Projects are based on research, and many help to support the Pennsylvania Department of Education Academic Standards.

This publication is available in alternative media on request.

Penn State is committed to affirmative action, equal opportunity, and the diversity of its workforce.
