Electricity

Recommended grade level:**Project length:****Cost:****Teacher's responsibility:****For more information, contact:**

Electricity is everywhere! Understanding the science behind electricity is important for everyone at any age. This project consists of a series of four project books with hands-on activities leading to an understanding of how electricity works. Play electric pyramid or electric bingo while exploring general electrical concepts and skills.

4-H and Schools: A Great Partnership!

4-H is a youth development program of Penn State Cooperative Extension. It is a nonformal education program for youth between the ages of 8 and 19.

4-H projects are offered to youth through community clubs, project clubs, and special interest groups, as enrichment to school curricula, and in the 4-H Afterschool program. Projects are based on research, and many help to support the Pennsylvania Department of Education Academic Standards.

This publication is available in alternative media on request.

Penn State is committed to affirmative action, equal opportunity, and the diversity of its workforce.
