Woodworking

Recommended grade level:

Project length:

Cost:

Teacher's responsibility:

For more information, contact:

Youth learn how to plan woodworking activities and select a project, and then become familiar with wood, tools, and methods needed to complete each project. Four project books target youth of different ages and skill levels. The books include instructions for different woodworking projects, ranging from a flower box and picture frame to a chair and table hockey game.

4-H and Schools: A Great Partnership!

4-H is a youth development program of Penn State Cooperative Extension. It is a nonformal education program for youth between the ages of 8 and 19.

4-H projects are offered to youth through community clubs, project clubs, and special interest groups, as enrichment to school curricula, and in the 4-H Afterschool program. Projects are based on research, and many help to support the Pennsylvania Department of Education Academic Standards.

This publication is available in alternative media on request.

Penn State is committed to affirmative action, equal opportunity, and the diversity of its workforce.
