

National Safe Tractor and Machinery Operation Program

The National Safe Tractor and Machinery Operation Program (NSTMOP) is a project of Hazardous Occupations Safety Training in Agriculture (HOSTA) for youth ages 14 and 15.

Why NSTMOP?

Since 1969, the U.S. Department of Labor has declared many agricultural tasks to be hazardous to youth younger than 16. With certain exemptions, employment of youth under 16 for tasks that require operation of a tractor and machinery is illegal unless the youth are certified. By successfully completing this certification program, 14 and 15 year old youth may legally operate farm tractors and powered machinery for hire which they otherwise would not be allowed to operate under the U.S. Department of Labor's Hazardous Occupations Order in Agriculture.

NSTMOP and HOSTA

The National Safe Tractor and Machinery Operation Program (NSTMOP) is a project of the United State Department of Agriculture Cooperative States Research, Education and Extension Service's Hazardous Occupations Safety Training for Agriculture (HOSTA) Program. It was developed to respond to the need for resources to inform and support the Youth Farm Safety Education and Certification Regulation which is administered by the U.S. Department of Labor.

Training is designed to consistently cover core content areas including safety basics, agricultural hazards, tractors, connecting and using implements with tractors and materials handling. Testing includes a written exam along with skills and driving tests.

For more information contact:

Please Note: As Penn State Extension prepares to launch a new Content Management System, the *National Safe Tractor and Machinery Operation Program* course for Instructors will see major changes. There will be a new process for Ag Instructors and Extension Educators on how to become certified in NSTMOP. This information will be posted once the program is up and running. In the meantime, if you have any questions regarding the program, please email Peggy Newel at png1@psu.edu
