Describe my science experiment

Question (What big idea or science concept do I want to explore):

Method (What steps and tools I will use to answer my science experiment question) :

Predict (What do I think will happen in my experiment or my hypothesis):

Investigate (What science experiment data I observed and recorded in words, charts or pictures):

Explain the results of my experiment (What is the answer to my science experiment question and what the observations mean or why I think the results happened):
