

## ***Cloverbuds: Bubble-Mania***

### Things to Try at Home A Drop of Water

#### **Materials:**

- Book: *A Drop of Water* by Walter Wick
- Bubble list
- Pencil

#### **What to do:**

- Read the book, *A Drop of Water* by Walter Wick.
- Try one of the experiments pictured in the book, like floating a pin in a glass of water. The pin floats on the water because of the water's surface tension. Bubbles also have surface tension.
- Water is all around us. The book shows us that there is a lot of science in a drop of water.
- Go on a scavenger hunt for other every day things in your home that hide science concepts like water and bubbles.
- Write down some of your every day science ideas in a list.
- What things did you think of show every day science?
- Can you think of a simple experiment that you can do that shows science in an every day object?

#### **Talk about:**

- What so you think scientists do?
- Are you and everyday scientist?

# Cloverbud Bubble-Mania

Go on a scavenger hunt for every day science objects or ideas hiding in your home like a drop of water or a bubble. Write down what you find below in a list.  
Can you think of a simple science experiment?
