

# Cloverbuds: Bugs, Butterflies, Worms, and Spiders

## Things to Try at Home Butterfly Origami

### Materials:

- Square of paper that is white on one side and colored on the other.  
Example: wrapping paper, origami paper. Larger paper is easier for beginners.

### What to do:

### Talk about:

Symmetry is a word that means that one side of an object is the same as the other. If you divided a butterfly in half both sides would be the mirror image of each other and have the same pattern. When you folded the butterfly you did the same folds on each side of the butterfly. What other things in your home have symmetry?
